

Barrington Coffee Roasting Company

Devotion, total commitment, fanaticism: these are good words to describe the power-coffee duo of Gregg Charbonneau and Barth Anderson. They founded Barrington Coffee Roasting Co. in 1993, responding to the need of many fine, local restaurants for locally roasted, high quality coffee. Barth, an environmental scientist by education, was drawn to coffee when he worked as a barista. Gregg started roasting coffee during his college years for a local coffeehouse and continued while building a career in art restoration. Local success has brought them national customers, but they remain devoted to the Berkshires, where they roast and package all their coffees.
